

BATTERY CHARGER

- Hydrometer
- Thermometer
- Charging system analyzer
- Polyethylene funnel
- Battery charger
- Battery terminal puller
- Terminal cleaning brush
- Portable water distiller
- Electrical tool set (2)
- Battery tester
- Starter tester
- Alternator test
- Wire cutting pliers

HYDROMETER

Moneks Ø63mm. Standart Plastic Body Bottom fit Hydrometer

Female connection : G ¼"

Scale :10 mws, 25 mws, 40 mws, 60 mws, 100 mws

THERMOMETER

TP6 Infrared Thermometer / Pyrometer

Professional laser pyrometer from the MultiMeasure Professional series:
Measurement lens 30:1, extremely wide temperature measurement range, from -50°C to +1,000°C, adjustable emissions level from 0.1 up to 1.0, high/low alarm.

CHARGING SYSTEM ANALYZER

BOSCH - BAT 110 Battery Tester

The BAT 110 is a rugged 12V battery tester capable of testing AGM and standard 12V batteries, plus testing 12V starting and charging systems.

BAT 110 — Battery Tester

Advanced, yet easy to use, the Bosch BAT 110 Battery Tester offers the shop an affordable tester with features not found in carbon-pile battery testers.

The BAT 110 is a rugged battery tester that uses state-of-the-art conductance technology to provide quick and accurate load-free testing of most types of 12V batteries, including AGM, standard, and maintenance-free batteries. In addition to conductance technology, the BAT 110 incorporates a temperature compensation feature to aid in battery tests results that are extremely accurate. Utilizing the test battery for power (no internal batteries to worry about), the BAT 110 can test batteries that are as low as 5.5 volts. As a voltmeter, the BAT 110 has a test range of 5.5V to 19.99V. The battery cold cranking amp test range is from 200 – 850 CCA.

This tester is also capable of diagnosing 12V charging systems and starters. For easy reference, the BAT 110 features a high and low voltage storage function when checking charging systems; and a low voltage storage function when testing starters.

The four-button keypad makes the BAT 110 a quick and simple tool to use. The large four-digit LED screen displays the voltage and CCA readouts quickly and clearly, while the three “stop-light” illuminated LED indicators show battery condition in an easy-to-read way: green = good; yellow = marginal and red = replace.

Bosch Diagnostics is leading the way with innovative and affordable solutions for today’s automotive aftermarket shops. The Bosch BAT 110 Battery Tester – with features such as AGM battery testing capability, temperature compensation and the advanced starting / charging hold functions – is the right tool, at the right time, at the right price to help make shops more efficient and productive!

POLYETHYLENE FUNNEL

BATTERY CHARGER

Amps Rate
Voltage Check
Alternator check
Carry Handle
Cable Storage
LED Display
Digital Smart Control

30/ 80 Amps

Yes
Yes
Yes

BATTERY TERMINAL PULLER

Designed to remove the battery cable clamp from the post without causing damage to the battery. Spring-loaded sharp jaws get under the clamp for a secure grip.

TERMINAL CLEANING BRUSH

PORTABLE WATER DISTILER

ELECTRICAL TOOLS SET (2 SET)

BATTERY TESTER

INLET VOLTAGE	8-36 VOLT DC
GİRİŞ AKIMI	100-210 AMP
DISPLAY	DIGITAL 3 LINE VOLTMETER
INLET CABLE	16 MM NYY 60 CM
PROTECTION	CLASS 2
COOLING	AIR
POWER	2400 WATT
DIMENSION	15X20X20 CM
WEIGHT	1.5 KG

STARTER & ALTERNATOR TESTER – 125 A

WIRE CUTTING PLIERS (SET) - PROFESSIONAL
